

A woman in industrial safety gear, including a welding mask, safety glasses, a purple headband, and heavy gloves, is using a black vacuum tool. A large cloud of orange dust or debris is being captured by the tool, creating a dramatic visual effect. The background is a blue-tinted industrial setting with a clock and a framed picture on the wall.

Which Accessories Match Your Machine?

In order for you to get the most out of your Dustcontrol, you need the right accessories. We supply cleaning equipment in all sorts of designs and materials. If your needs are not met by our standard assortment, we can manufacture customised solutions. Please speak to your sales representative for more information.

Our symbols

Suitable for example Extractor DC1800 / DC 2900
MINI < 300 m³/h

Suitable for example Extractor DC Tromb / DC Tromb Twin
MIDI > 300 m³/h

Suitable for example Extractor DC Storm
MAXI > 500 m³/h

Products with this mark - Good for food - meets all Industry requirements for color coding, antistatic material, hygienically cleanable and allows for automatic detection.

The product is antistatic and has an ESD certificate.

The product can be used in an Ex environment.

Lighter Cleaning

Cleaning accessories with low weight for easier cleaning in for example an office environment.

NEW SOLUTION!

DC Reach – High Level Cleaning System

Ø38 mm

MINI

MIDI

MAXI

Upgrade your cleaning routines with our new solution!

With our innovative cleaning technology DC Reach, it has never been easier to remove dust and combustible materials from high altitudes and hard-to-reach places. Traditionally, cleaning at height has involved hydraulic lifting aids, work platforms and at least two people to carry out the job safely. Now the task can be solved safely by one person.

The system consists of a pipe system with straight pipe parts and bends that are connected as desired. Along with this, there are several suction nozzles to meet the customer's unique needs.

In addition to the standard version of DC Reach, there is also DC Reach ATEX for customers who need equipment suitable for an ATEX environment. All these components are certified and meet the ATEX-directive 2014/34/EU: ISO 80079-36:2016, ISO 80079-37 and are NFPA certified.
